JOB SKILLS

- Specialised in full stack mobile & web development, utilizing **React Native, Expo, React.js, Next.js, Node.js, JavaScript, TypeScript, Redux, Redux Toolkit, GraphQL, RESTful APIs.**
- Developed a dynamic **Full stack CI/CD system** with **React & Node.js** backend for Fastlane, achieving **70%** faster APK & IPA generation & significantly boosting productivity**.**
- Deft in **Agile Frameworks**, proven track record of faster task deliveries and process adherence, adept **Scrum Master**, collaborating effectively with cross-functional teams.
- Proficient in **unit, integration & end-to-end testing** and efficiently addressed **200+** bugs, resulting in increased app ratings to **4.7** on Android and **4.8** on iOS.
- **Building & deploying 10+ React & React native applications** in production environments with own CI/CD system (**Fastlane**).
- Leveraging **native APIs** & **SDKs** for both Android & iOS (**Java & Objective C**).
- Integrated payment gateways (**Authorize.net & Stripe**), conducted **A/B testing** for subscription plans, resulting in a **7%** increase in company revenue.

TOOLS & TECHNOLOGIES

Frameworks	React Native, Node.js, Next.js, Express.js, Tailwind CSS
Languages/ Libraries	React.js, JavaScript, TypeScript, HTML, ES6+, Mongoose, Java, Objective C, Storybook, NativeWind
Build Tools & Technologies	Gradle, Android Studio, XCode, Lerna, Postman, Test Flight, Responsively.app
CI/CD	Fastlane, Github Actions, Webpack, Vercel, Netlify, Bitrise, Jenkins, Docker, App Center, AWS S3, AWS EC2, AWS Amplify
Databases & Storage	Offline Storage, MongoDB, Firebase realtime database
State Management	Redux, Redux Toolkit, Context API, Graph QL, Apollo Client, Middleware(Thunk & Saga)
Unit Testing	Jest, React testing library, Appium, Detox
Version Control System	Git, Github, Monorepo

WORK EXPERIENCE
May 2023 - Present

Software Engineer Dev 2
IGT, Hyderabad, India

- Leading the development of complex, **responsive UI** components using React and React Native for a lottery gaming application, which serves over 2,000 daily active users.
- Experienced in **Monorepo architecture**, contributing to **110+** private npm packages.
- Implementing robust automated workflows with **Github Actions** and **Dependabot**, saving the team **2+ hours** daily & efficiently managing the outdated dependencies.
- Played a pivotal role in achieving a smooth **React Native upgrade.**
- Integrating the customer engagement platform **Xtremepush**, resulting in enhanced customer engagement, **boosting company revenues**.

Achievements

- Initiated **Tech Tuesday** meetups and eliminated multiple production issues by discussing, documenting and implementing best solutions collaboratively.

Jun 2019 – May 2023

Senior Software Developer
Rently Software Development Private Limited, Coimbatore, India

- Led the development of a web & mobile Smart Home Rental Application with **5000+** daily active users working on **IoT, MQTT, Bluetooth, Payment gateway, Maps, Heap, Sentry & Firebase.**

- Spearheading the development and maintenance of **3 diverse applications**, while adeptly handling **10 white-labeled applications**.

- Pioneered in **MQTT & Bluetooth Hardware (BLE)** integration for accessing **12+** iOT devices (Hubs, Smart Locks, Sensors, etc.) from the application User Interface.

- Integrated **Beans Map**, effectively addressing the user navigation challenge and contributing to a **10%** rise in app downloads.

- Practical knowledge in **code signing, app store reviews** & **codepush**.

- Conducted **100+ code reviews**, emphasizing **high-quality code** through clean code principles.

- Competent in UI/UX design patterns, with a hands on approach for creating visually appealing & user-centric interfaces using **Figma, Adobe, Miro, Material UI** & **React Native elements** library.

- **Mentored 10+ junior developers** to deliver multiple modules in the Smart Home application.

- Facilitated Authentication **(AWS and Azure SSO)** & in-app chat **(ADA Chatbot)** integrations.

Achievements

- Achieved building own CI/CD system with **Fastlane,** saving the team **6+ hours** per day for build generation, beta and store releases.

- Optimized app performance & user experience by **25%** by integrating Firebase Performance Monitoring & shopify performance libraries & iterated based on metrics insights.

- Achieved a **100%** tests coverage by implementing the **Appium** framework for automated tests.

- Achieved moving Jenkins from a local machine to **AWS EC2 cloud with Docker**, which saved us **4 hours** of daily manual work for test automation.

Bachelor of Engineering (Computer Science) | Karpagam Institute of Technology,
Tamil Nadu

Aug 2016 - May 2020

LANGUAGE

English – Native verbal and written communication

PERSONAL SKILLS

- **Flexibility**: Proficient in adjusting to changing priorities, tasks, and environments while maintaining a high level of productivity.

- **Problem-Solving:** Problem solver with a pragmatic approach, demonstrating analytical thinking, strong technical skills, and a proven track record in innovatively solving problems.

- **Leadership:** Exemplifying software development leadership with a proactive approach, effective team collaboration, and the ability to deliver innovative technical solutions.

- **Keen learner:** Proactively seeks continuous growth by exploring and implementing the latest technologies in personal projects.
